CodeMe Workshop: Programming with BBC micro: bit

The **CodeMe** Workshop is a Hands-On Experience

The objectives:

An opportunity for all of you to gain knowledge of computer science.

An introduction to fundamental concepts and applications of computer science.

The **CodeMe** Workshop is a Hands-On Experience

The objectives:

Run a range of activities that focus on physical computing, featuring things that move, buzz, or light up.

Having fun with coding while also learning.

Hardware Equipment

Hardware Equipment

micro: Maqueen

micro: bit

USB cable

Hardware Equipment

 micro:bit

a pocket-sized
computer that lets
you be creative
with digital
technologies

2 programmable buttons

25 LEDs

USB connector

- 20 gold tab edge pins
- 5 ring connectors
- 3 for digital/analogue input/output
- 2 for power

Radio Antenna

Microphone

Processor

Software

Microsoft MakeCode

an online learn-to-code platform

Hour of Code

Activity 1: Looping Concept

A loop is something that repeats again and again until it is told to stop.

Programmer specifies several processing steps and instructs the computer to carry out the loop as many times as they need.

Task 1: 5 Minutes

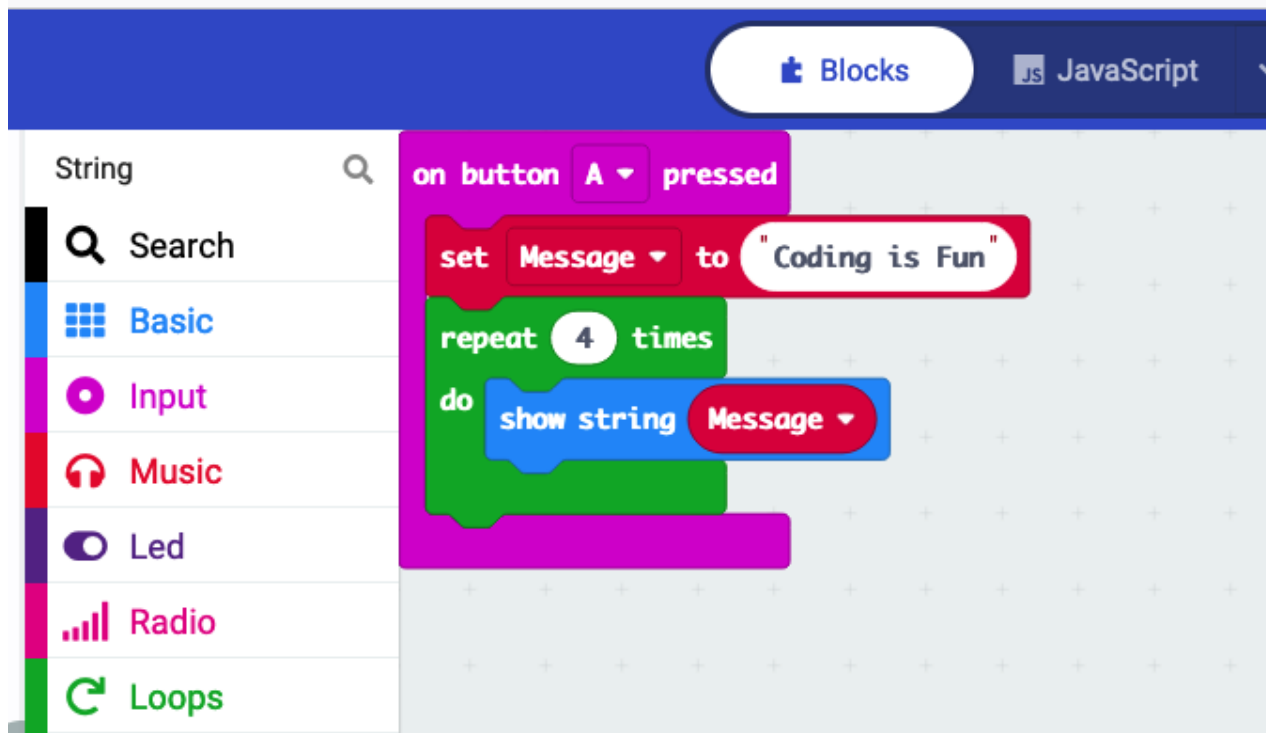

**1 person
is coding**

**3 people are
observing and assisting**

Task 1: write this simple code and test it with your micro: bit

Activity 2: Selection Concept

Selection statements (also known as conditional statements) are pieces of code that are only completed if certain conditions are met.

These are often referred to as “IF-THEN” statements.

Task 2: 5 Minutes

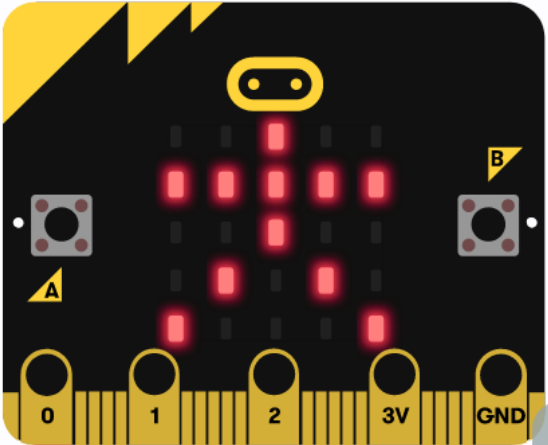

**1 person
is coding**

**3 people are
observing and assisting**

Clap Lights

Activity 3: Sequencing concept

A sequence simply specifies the order of the tasks.

A programmer tells a computer which tasks to perform first, which to perform second, and so on, so that every requirement falls into place in its proper sequence.

Task 3: 5 Minutes

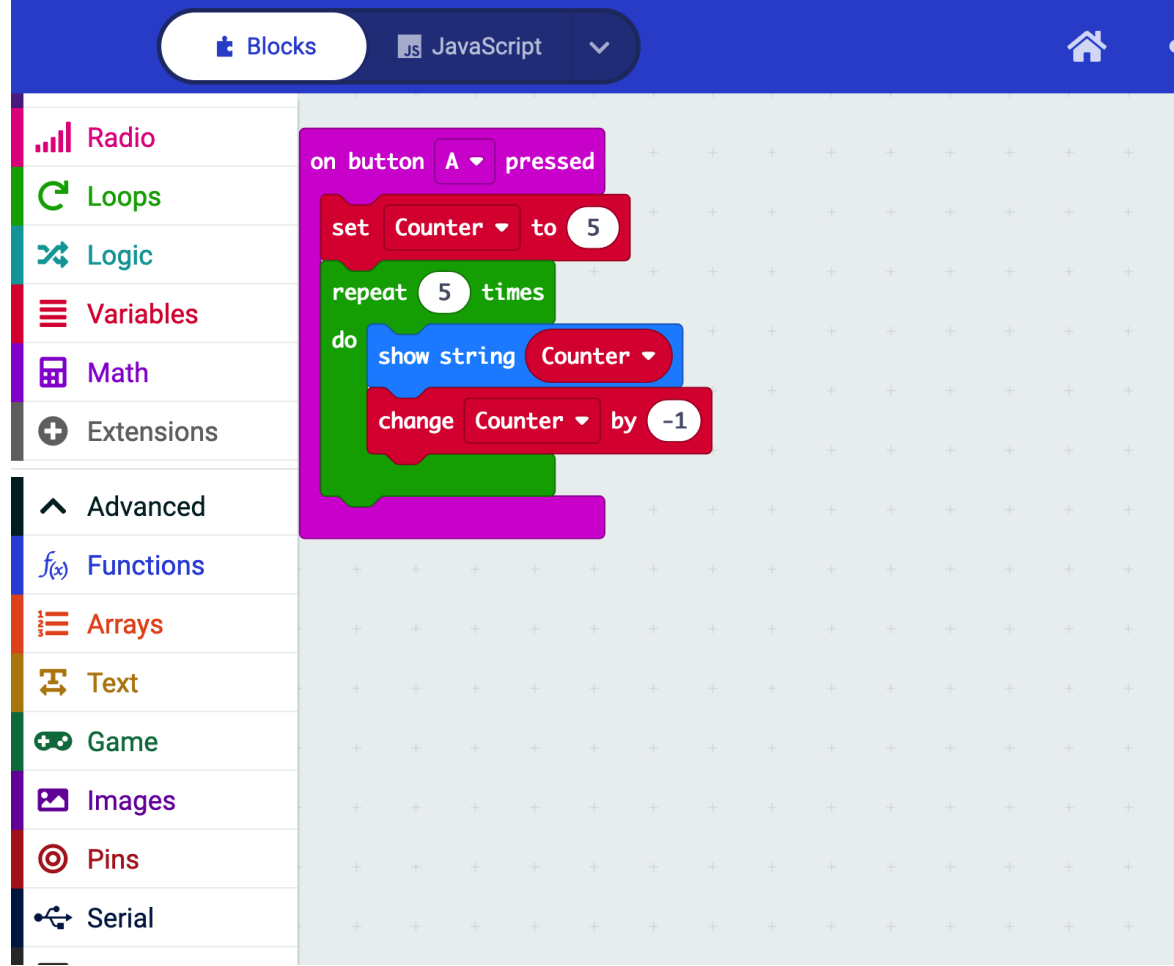

**1 person
is coding**

**3 people are
observing and assisting**

Task 3: write this simple code and test it with your micro:bit
